

UnattendedPayments from ADVAM is a fully featured unattended payment solution that provides a more convenient way for your customers to pay. UnattendedPayments integrates with your existing equipment and is ideally placed for parking, vending and self service markets.

Remove cash management issues with EMV Compliant solutions

UnattendedPayments is an end-to-end solution that has been developed by ADVAM, and because the terminals and our processes are EMV certified, we're ideally placed to guide you through the journey to implementation.

Integration with existing unattended equipment

UnattendedPayments readers integrate with your existing self-service, parking and vending equipment to deliver unmatched flexibility in form design, kiosk integration, physical mounting and communication options. Readers can be deployed as an all-in-one unit or as a modular set.

Management planning and reporting

UnattendedPayments' tools enable you to manage transaction data. It can also be linked to your business intelligence and CRM solutions enabling you to improve your understanding of customer purchase trends and enhance your management of their future likely preferences.

Robust and tested to perform

Our payment terminals are robust, and have been tested to withstand even the harshest weather conditions.

Allows offline processing

UnattendedPayments supports offline processing modes to provide operational continuity of service when online communications or network connection to kiosk or car park is unavailable – ensuring that you don't miss a payment.

How UnattendedPayments works

Install and pay

UnattendedPayments includes certified payment readers that integrate with your existing equipment. UnattendedPayments takes away the challenges of cash management, and enables consumers to pay via card or mobile device, including magstripe, EMV compliant chip and pin or NFC.

Seamless, secure payment

Your customer's payment is processed reliably and efficiently from their bank to your preferred bank through ADVAM's payment gateway. UnattendedPayments is a proven processing capability that's fully secure, compliant and integrated with acquiring banks, and it's also compatible with mobile device wallet solutions.

About ADVAM
