ADVAM
the way to pay
A **TNS** Company

GroundTransport from ADVAM is a taxi and bus operator traffic management solution that enables you to manage access and improve the flow of traffic around your transport hub.

Managing access and traffic flow
With GroundTransport, traffic flows efficiently and securely into and out of your transport hub – cutting queues, and improving the passenger experience.

Management planning and reporting
GroundTransport's tools enable you to manage access, pricing and registration criteria. It can also be linked to your business intelligence solution enabling you to improve your understanding and enhance your management of access requirements.

Presented as part of your brand
GroundTransport integrates with your website or your licensee's website, giving taxi and bus operators a self-provisioning tool, seamless registration and payment experience.

Select GroundTransport, and you will be able to secure step-changes in passenger experience, while simultaneously achieving cost-efficiencies, maximising security and enhancing transport provider performance.

How GroundTransport works

Simple registration, easy payment options
Vehicles are registered from your branded website, the payment method is selected from the options that you have pre-determined – including pre-pay with auto top-up, pay-as-you-go via a linked card, or seasonal payments.

Ticket-free access using your existing equipment
ADVAM is an expert in integrating our solution with your existing equipment such as ANPR, RFID tag or access cards. We are access control agnostic and will work with your preferred hardware.

Drive in, drop off, pick up, and go
The operator or licensee's access fee is automatically calculated, deducted and paid to your preferred bank according to the system rules you have defined – removing the cost, complexity and time of manual tolling.

About ADVAM

ADVAM delivers world leading payment solutions enabling our clients to engage with their customers.
